

SHEIKH MUHAMMAD ISMAIL

Full-Stack & Native App Developer · MERN & Next.js · TypeScript · Payment Integrations

+92 310 2437201 | sheikhmuhammadismail45@gmail.com | Karachi, Pakistan | [Portfolio](#) | [LinkedIn](#) | [GitHub](#)

PROFESSIONAL SUMMARY

Full-stack and native app developer with 3+ years of experience designing and shipping production web and mobile applications across the MERN stack, Next.js, and React Native. Comfortable owning a feature end-to-end — from data model and API design through to containerized deployment with Docker and post-launch support. Recent work spans e-commerce platforms, AI-integrated SaaS tools, and client-facing systems with secure payment gateway integration and automated email workflows. Known for turning ambiguous client requirements into clean, maintainable code and for staying hands-on with a project through launch and iteration, not just the first release.

TECHNICAL SKILLS

Languages: JavaScript (ES6+), TypeScript, Python, SQL, PHP

Frameworks & Libraries: React, Next.js, React Native, Node.js, Express.js, Redux, Tailwind CSS, Vite

Platforms & CMS: WordPress (custom themes & plugins), Shopify (Liquid, bilingual/RTL storefronts)

Databases: MongoDB, MySQL, Oracle Database, Prisma ORM, Supabase

Tools & DevOps: Git, Docker, GitHub Actions (CI/CD), Postman, AWS Fundamentals, Cloudinary

Other: RESTful API Design, JWT Authentication, Payment Gateway Integration, AI/LLM Integration

PROFESSIONAL EXPERIENCE

Full-Stack Developer | [Nexagon Agency](#)

Jan 2026 – Apr 2026

Greater London, UK · Remote

- Built and maintained client-facing web applications across the MERN stack, owning both the React frontend and the Node/Express API layer.
- Integrated payment gateways with proper transaction handling, retries, and error recovery so failed payments didn't silently drop orders.
- Containerized development and production environments with Docker, cutting down on "works on my machine" issues between teammates.
- Designed and documented REST APIs consumed by both web and mobile clients.
- Investigated and resolved production incidents, and improved page load times through targeted performance fixes.

Full-Stack & Native App Developer | [Core4Technologies Pty Ltd](#)

Jan 2025 – Apr 2026

On-site

- Developed and deployed full-stack applications and marketing landing pages using the MERN stack with Redux for state management.
- Built responsive interfaces and integrated third-party components to improve engagement and conversion on client sites.
- Maintained Git-based version control and CI/CD pipelines with GitHub Actions to keep releases predictable.
- Worked closely with designers and product leads to translate mockups into shipped features on schedule.

Junior Full-Stack Developer | [Codex](#)

Nov 2024 – Feb 2025

Remote

- Built full-stack applications with responsive frontends and scalable Node/Express backends.
- Used Prisma ORM for type-safe, efficient database interactions with MongoDB, reducing runtime query errors.
- Took part in code reviews and handled production deployments to keep the codebase consistent and reliable.

Frontend Developer | [GFX Mansion](#)

Sep 2023 – Nov 2024

On-site

- Built responsive, accessible web interfaces using React, Tailwind CSS, and TypeScript.
- Improved performance and cross-browser compatibility by migrating tooling to Vite and adopting React Query for data fetching.
- Developed a reusable component library and integrated REST APIs via Axios, cutting duplicate UI code across projects.

Freelance Full-Stack Developer | Independent / Referral-Based Clients

2022 – Present

Remote

- Deliver end-to-end web projects for small businesses through direct referrals — recent clients include a UK-based garage door company (WordPress) and a bilingual luxury jewelry brand (Shopify).
- Built a quote-to-invoice system in PHP/WordPress: AJAX-based quote submission, a custom database table, PDF invoice generation with VAT breakdown, and automated customer/admin email delivery via SMTP.
- Developed a fully bilingual (Arabic/English) Shopify storefront with a custom RTL-aware header, mega menu, and language toggle, matching the brand's visual identity precisely.
- Handle the full lifecycle on these engagements — requirements, build, deployment, and ongoing support — rather than handing off after initial delivery.

SELECTED PROJECTS

Askly — AI-Powered Search Engine [Live](#) | [GitHub](#)

Full-stack, Perplexity-style AI search engine that combines live web search with LLM reasoning to return cited, source-backed answers, images, and persistent chat history.

React · TypeScript · Vite · Tailwind CSS · shadcn/ui · Node.js · Express · Supabase · Tavily API · Groq (Llama 3)

PixelNimbus — AI Media Optimization SaaS [Live](#) | [GitHub](#)

SaaS platform that uses AI to compress and optimize images/video, helping users cut media file size while preserving visual quality for faster page loads.

Next.js · Tailwind CSS · Node.js · Express · MongoDB · Google Cloud Platform

Prime Lube Tech — Automotive Lubricants Survey Site [Live](#)

Marketing and product-survey website for an industrial lubricants brand, covering engine oils and gear/fluid product lines with a catalogue download and bilingual (EN/AR) support.

Next.js · Tailwind CSS · Responsive/Bilingual UI

Quality Paint Palace — E-Commerce Platform [Live](#) | [GitHub](#)

Full-stack storefront with product browsing, cart, checkout, and user authentication, plus an admin panel to manage orders, products, and customers.

React.js · Tailwind CSS · Node.js · Express · MongoDB · Google Cloud Platform

7even86GameHub — Digital Gaming Marketplace [Live](#) | [GitHub](#)

Marketplace for digital games with browsing, wishlists, purchases, and an admin dashboard to manage listings, sales, and reviews.

React.js · Tailwind CSS · Node.js · Express · MongoDB · Google Cloud Platform

Sachchu Store — E-Commerce Platform [Live](#) | [GitHub](#)

End-to-end e-commerce build covering product catalog, cart, order placement, authentication, and an admin panel for order/product management.

Next.js · Tailwind CSS · Node.js · Express · MongoDB · Google Cloud Platform

MediaForgeSolutions — Digital Marketing Agency Website [Live](#)

Marketing agency site presenting SEO, social media, content marketing, branding, and paid advertising services through detailed service pages, case studies, and conversion-focused contact forms. Doubles as a portfolio and lead-generation tool for the agency.

Next.js · Tailwind CSS · Node.js · Express · MongoDB · Google Cloud Platform
